

<b>LOCKHEED AIRCRAFT CORP.</b>		ENGINEERING STUDY <input type="checkbox"/> CHANGE PROPOSAL <input checked="" type="checkbox"/>		<b>LAC - 72</b>							
DATE 2-19-60		AFFECTS:                      WSPO <input checked="" type="checkbox"/> PROJECT <input checked="" type="checkbox"/>									
NAME OF MAJOR COMPONENT <b>HYDRAULIC SYSTEM</b>		PART OR LOWEST SUBASSEMBLY <b>HYD. PRESS. TRANSMITTER</b>		PART NO. & MODEL OR TYPE							
TITLE OF PROPOSAL : <b>RELOCATION OF HYDRAULIC PRESS. TRANSMITTER</b>											
NATURE OF PROPOSAL :  1. Relocate the existing hyd. pressure transmitter on U-2A A/C only per drawing H188 (attached) to a position accessible with the engine installed. Not applicable to serials 391 through 395 which already comply.  2. Prepare and issue a Service Bulletin (S/B 370).  3. Fabricate appropriate Kits.  <b>NOTE:-</b> We are proceeding with this work in advance of written authority as it is proposed to include this modification in the present IRAN program.											
REASON FOR PROPOSAL :  Provide a new location on U-2A airplanes for the hydraulic pressure transmitter to eliminate the necessity of removing the engine for maintenance or replacement of the transmitter (Ships 391 through 395 already comply). Transmitters in some affected aircraft have been relocated as a result of field repairs, but not necessarily in accordance with drawing H-188. This proposal would standardize all ships and provide external access to the transmitter.
